INTRODUCTION

INTERNATIONAL AEROSPACE ABSTRACTS (IAA) is an abstracting and indexing service covering the world's published literature in the field of aeronautics and space science and technology. IAA is issued semimonthly, on the 1st and 15th of each month.

Coverage of Published Literature

The following types of publications are covered in IAA:

- Periodicals (including government-sponsored journals) and books.
- Meeting papers and conference proceedings issued by professional societies and academic organizations.
- Translations of journals and journal articles.

Coverage of Reports ("Unpublished" Literature)

Abstracts and indexes of report literature are issued in SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS (STAR), which is published by the Scientific and Technical Information Division, National Aeronautics and Space Administration.

By special arrangement between NASA and the American Institute of Aeronautics and Astronautics, IAA is issued in coordination with the twice-monthly schedule of STAR, which appears on the 8th and 23rd of each month.

IAA and STAR utilize both identical subject categories and indexes, which are described below.

Thus the two services provide comprehensive access to the national and international unclassified report and published literature of current significance to aerospace science and technology.

Arrangement of the Semimonthly Issues

IAA is arranged in two major sections:

- (1) Abstracts Section. This section contains complete bibliographic citations with informative abstracts, arranged by appropriate subject categories to facilitate scanning. The subject categories are numbered from 01 to 34, and the scope of each category is outlined in the Table of Contents and again at the beginning of each category in the Abstracts Section. Each abstract is prefixed by the IAA accession number.
- (2) Index Section. Four indexes are contained in this section: Subject, Personal Author, Report Number, and Accession Number. Each index is prefaced by explanatory notes to guide the user to the desired abstract.

Cumulative Indexes

Cumulated indexes are prepared and issued promptly on a quarterly basis, with the second quarterly being a semi-annual index, and the fourth quarterly being the annual index.

Each cumulated index contains the following sections: A—Subject Index, B—Personal Author Index, C—Report Number Index, and D—Accession Number Index.

NOTE: A user survey has indicated only a limited use for Corporate Source Index in the Cumulative Indexes to IAA. Accordingly, as an economy measure, the Corporate Source Index has been discontinued.

Guide to the Subject Index

A GUIDE TO THE SUBJECT INDEXES FOR STAR has been issued by the Scientific and Technical Information Division of NASA. This publication contains an alphabetic listing of the subject headings and cross-references used in both STAR and IAA indexes, which use the same subject terminology.

Subscribers to the IAA Cumulative Indexes may obtain copies of the guide by writing to the AIAA Technical Information Service, 750 Third Avenue, New York, N. Y. 10017.

Information regarding SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS and the availability of INTERNATIONAL AEROSPACE ABSTRACTS to organizations having contractual arrangements with NASA may be obtained from the following address:

HOW TO OBTAIN PUBLICATIONS ABSTRACTED

All publications abstracted are available from the AIAA Technical Information Service,
750 Third Avenue, New York, New York 10017

LOANS

Individual and Corporate AIAA Members in the United States and Canada, and NASA Centers, may borrow publications without charge. Interlibrary loan privileges are extended to the libraries of government agencies and academic nonprofit institutions in the United States and Canada. The loan period is two weeks, excluding transit time. The borrower pays return postage and insurance.

PHOTOCOPIES

Documents can be supplied in the form of positive paper copies or negative 35-mm microfilm. In addition, certain documents, marked with the symbol • (this symbol appeared only in issues 23 and 24), are available in 4 x 6 inch microfiche form.

RATES

Positive paper copies	\$0.25 per page
minimum order	\$1.50
Negative 35-mm. microfilm	\$0.20 per frame
minimum order	\$2.50
Microfiche	\$0.50 per microfiche

(Minimum air-mail postage to foreign countries is \$1.00)

Requests for loans or photocopies may be made by mail, telephone, telegram, TWX, or in person.

Address all inquiries and requests to:

Technical Information Service
American Institute of Aeronautics and Astronautics, Inc.
750 Third Avenue, New York, N. Y. 10017
Telephone: 212 TN-7-8300
TWX: 212 867-7265

PLEASE REFER TO THE ACCESSION NUMBER WHEN REQUESTING PUBLICATIONS

NOTE: The AIAA does not sell the publications abstracted, except those issued by the AIAA.

LISTING OF PERSONAL AUTHORS
OF PUBLICATIONS

Citation of Content, rather than the title of the publication, appears under each author listing. The IAA accession number is located under and to the right of the Citation of Content (for example, A64-12345), followed by the issue and category number (for example, 13-02). The first two digits of the category identify the issue number of *International Aerospace Abstracts*, and the two digits following the hyphen identify the subject category as listed in the Table of Contents in each semimonthly issue.
